- Turn off when new call has been read. Scroll up/down the menu items/Phonebook list/Redial list/
- Call List

#### 2. PRECAUTIONS The signal quality will depend on the location and environment of

the base and handset. Position your Versatis F200/Versatis F250 away from sources of excessive heat (radiators, direct sunlight, etc.) and protect it from vibrations and dust. Never allow your telephone to come into contact with water or other liquids, or with aerosols. To reduce the risk of interference and optimize reception, take particular care not to install the base in the immediate vicinity of windows, large metal objects, reinforced concrete, televisions, music centres, VCR or DVD players, halogen lamps or heating devices, fluorescent lighting, burglar alarms, microwave ovens, computers, etc.

This telephone requires an electrical power supply in order to function.

- To clean your Versatis F200/Versatis F250, use an antistatic cloth lightly moistened with water.
- NB: Your Versatis F200/Versatis F250 is a DECT<sup>™</sup>\* standard appliance designed to receive and transmit telephone calls. It is designed for connection to the public telecommunications network.

# 3. INSTALLING YOUR PHONE

- 3.1. Installing and Charging the Batteries Slide down to open the battery compartment cover.
   Place the 2 supplied AAA rechargeable batteries as indicated.
- Pay extra attention to direction of polarity. Slide the battery compartment cover back
  - 4. Put the handset on the base and charge for 15 hours before using the handset for the first time. The handset will give a beep when it is properly placed on the base or charger.

#### Notes:

1. Use only the supplied NiMH rechargeable batteries. 2. If the handset will not be used for a long time, disconnect and remove the batteries to prevent possible leakage.

- 3.2. Connecting the Base Station 1. Plug one end of the telephone line cord into the telephone

  - base bottom.

- Always use the cables provided in the box.

If you have broadband service, a micro-filter (not included) is required

3.3. Connecting the Charger(s) (for Duo/Trio models) Plug the power adapter into mains socket.

If you connect your telephone to a line with a broadband

telephone and the telephone line, otherwise you may get

connection, you will need to insert a micro-filter between the

interference between the telephone and the broadband, which

modem is connected to. If you need more broadband micro-

In a home with broadband, every telephone must have a micro-

filter connected, not just the one at the telephone point that your

comply with new regulations.

#### 4. USING YOUR PHONE

#### 4.1. Make a Call

4.1.1. Preparatory Dialing Enter the phone number and press  $\bigcirc$  or  $\bigcirc$  (Versatis F250 Only) to dial the number. Press  $\bigcirc$  to clear the entry.

#### 4.1.2. Direct Dialing Press $\fbox$ or $\fbox$ (Versatis F250 Only) to take the line and enter the phone number.

#### 4.1.3. Dial from Direct Memory Keys

In idle or off hook mode, press and hold 1/2/3 to dial the direct memory number. You have to store number to the related key first. See section 7.4 for reference.

#### 4.1.4. Call from the Redial List

Press ▲ (Versatis F200 Only) or ▼ (Versatis F250 Only) to access the redial list and press  $\Delta / \nabla$  to select the desired redial number. Press 🚺 or 🔳 (Versatis F250 Only) to dial out to the selected redial number.

4.2. Handset Speakerphone (Versatis F250 Only) During a call, you can press <a>> to alternate between handsfree</a> and normal handset use.

#### 5. PRIVATE PHONEBOOK

Your phone can store up to 50 private phonebook entries with names and numbers. Each phonebook entry can have a maximum of 20 digits for the phone number and 12 characters for the name. You can also select different ringtones for your phonebook entries. Phonebook entries are stored alphabetically by name.

#### 5.1. Add a New Phonebook Entry

In idle: 1. Press 😰 to access the phonebook.

- OR Press  $\mathbb{D}_{\mathsf{M}}^{\mathsf{T}}$  and  $\mathbf{\Delta}/\mathbf{\nabla}$  to select **PHONEBOOK** main menu item
- and then press  $\mathbf{x}$  to access the phonebook.

- Press ( ) to enter the name.
   Press ( ) to enter the number.
   Press ( ) to enter the number.
   Press ( ) to enter the number.
- phonebook entry 6. Press to store the phonebook entry

#### 5.2. Call from the Phonebook

In idle: 1. Press 😰 to access the phonebook.

- OR Press  $\fbox{M}$  and  $\texttt{A}/\textbf{\nabla}$  to select **PHONEBOOK** main menu item and then press K to access the phonebook
- 2. Press 🚺 or 🔳 (Versatis F250 Only) to dial out to the selected phonebook entry.

#### 6. CALLER DISPLAY (NETWORK DEPENDENT)

This feature is available if you have subscribed the Caller Line Identification service with your telephone service provider. Your phone can store up to 20 received calls with date/time information in the Call List. The number will be shown on the LCD when the phone is ringing. If the number matches with one of the entries in your Private Phonebook, the caller's name stored in the private phonebook will be displayed alternatively with the number. The handset will ring with the melody associated with that phonebook entry.

#### If the caller number is disabled to send caller information

"WITHHELD" will display. If the caller number is not provided, "OUT OF AREA" will display. In standby, if three unanswered calls are received, "3 NEW CALLS" will be displayed.

#### 6.1. View the Call List

All received calls are saved in Call List with the latest call putting at the top of the list. When the call list is full, the oldest call will be replaced by a new call. The unanswered call which has not been read is marked with a  $\star$  at the centre of the bottom line of the display.

Press ▲ to access the call list.

- OR Press  $\overline{M_{\text{MENU}}^{\text{DK}}}$  and  $\Delta/\nabla$  to select CALL LIST.
- 2. Press  $\overline{\mathbf{A}}/\mathbf{\nabla}$  to select the desired entry. 3. Press 🛒 to view the caller's number if applicable.

#### 6.2. Call from the Call List

In idle: 1. Press ▲ to access the call list.

OR

Press  $\mathbb{R}$  and  $\Delta / \nabla$  to select CALL LIST. 2. Press 🚺 or 🔳 (Versatis F250 Only) to dial out to the selected phonebook entry.

#### 7. PHONE SETTINGS

- 7.1. Set the Ringer Melody for Internal/External Calls
- Press I and △/▼ to select HS SETTINGS.
   Press I and △/▼ to select RING SETUP.
- 4. Press  $\overrightarrow{DK}$  and  $\overrightarrow{\Delta}/\overrightarrow{\nabla}$  to select the desired ringer melody from the melody list.
- Note: The respective ringer melody will be played while browsing the melody list. 5. Press K to confirm.

- 7.2. Set the Ringer Volume
- Press with and △/▼ to select HS SETTINGS.
   Press with and △/▼ to select RING SETUP.
  - Press and  $\mathbf{\Delta}/\mathbf{\nabla}$  to select **RING VOLUME**.
- 4. Press  $\overrightarrow{\mathbb{QK}}$  and  $\overrightarrow{\mathbf{A}}/\overrightarrow{\mathbf{\nabla}}$  to select the desired ringer volume (a total of 6 ringer volume levels including VOLUME OFF). Note: The respective ringer volume will be played during your

selection If **VOLUME OFF** is selected, **\$** icon will display. 5. Press K to confirm.

### 7.3. Adjust Earpiece and Handsfree (Versatis F250

**Only) Volume** There are 5 levels (VOLUME 1 to VOLUME 5) to choose from for each of earpiece and handsfree (Versatis F250 Only) volume.

During a call: Press  $\Delta / \nabla$  to select volume 1-5. The current setting is shown. When you end the call, the setting will remain at the last selected level.

#### 7.4. Store Direct Memory Access Number

You can store three direct access numbers into digit KEY 1, KEY 2 and KEY 3, which will be convenient for you to dial to these numbers directly.

- Press I and △/♥ to select HS SETTINGS.
   Press I and △/♥ to select DIRECT MEM.
   Press I and △/♥ to select any one from KEY 1, KEY 2
- and KEY 3. Press MENU and then enter the number you would like to store, 4.
- or edit the number existed before. 5. Press K to confirm.
- Note: Press and hold 1, a or to call the stored number.

#### 8. REGISTRATION

Your handset and base station is pre-registered. Up to five handsets can be registered to a single base station. If for some reason, the handset is not registered to the base station (III flashes even when the handset is near the base station), register your handset according to the following procedure.

- 1. Press and hold **(** on the base station for about five seconds,
- the base station is entered into registration mode. Press  $\square K \square$  and  $\triangle / \forall$  to select **REGISTRATION**.
- 3. Press and you are requested to enter the 4-digit system
- PIN (default PIN is 0000).
- Enter the 4-digit system PIN. 5. Press KING to confirm.

9. TECHNICAL DETAILS

Intercom Mode Three-Way Conference

If the handset registration is successful, you will hear a confirmation tone and the **II** will stop flashing. The handset will automatically be allocated the next available handset number. This handset number is shown in the handset display in standby mode. If the handset registration is unsuccessful, the III will still flash

#### **10. TROUBLESHOOTING**

If you have difficulty with your phone, please try the suggestions listed below.

As a general rule, if a problem occurs, remove the batteries from all the handsets in your installation for about 1 minute, then disconnect and reconnect the power supply to the base and reinstall the handset batteries.

Problem	Cause	Solutions
No dialing tone when pressing ( key	<ul> <li>a. The connection cord of the base station is not plugged in.</li> </ul>	<ul> <li>a. Check the connections. Unplug and plug back in the mains. Check that the telephone line cord has been plugged into the base station and the phone socket.</li> </ul>
	<ul><li>b. The adapter cord is not plugged in correctly in the base station.</li><li>c. The line is busy, as another handset is</li></ul>	<ul> <li>b. Check the base station plug and the 220V plug (remove and plug-in).</li> <li>c. Wait until the line is unoccupied.</li> </ul>
	used. d. Wrong connection cord.	d. Use the original connection cord.
" <b>OUT OF</b> <b>RANGE</b> " is displayed.	<ul> <li>a. Base station out of range.</li> <li>b. Base station not connected to mains.</li> </ul>	<ul><li>a. Reduce the range.</li><li>b. Connect base station to mains.</li></ul>
The call does not work.	Service not activated or wrong operator.	Check your Subscription with network.
No display.	Empty battery.	Recharge battery.

The store where you bought your telephone can also provide you with information and after-sales support.

#### 11. SAFETY

In the event of an electrical hazard, the mains adapter acts as 230V power isolating device. It should therefore, as a precaution, be installed close to the appliance and be easily accessible. To disconnect the device from the primary power source, the mains adapter must be removed from the 230V AC/50 Hz socket.

If the mains adapter fails, it must be replaced by an identical model.

If not connected to the mains power or if there is a mains power failure, telephones that use cordless handsets will not work.

You will then be unable to make or receive calls in the event of an emergency.

This is why we recommend that you also keep a conventional telephone – one that doesn't require a power supply – as a backup.

#### ! Do not use your telephone to notify a gas leak when standing in the vicinity of the leak.

It is recommended that you avoid using this device during electrical storms.

Do not attempt to open the batteries, as they contain chemical substances. In the event of leakage, avoid contact with the skin, eyes, nose and mouth. In the event of contact, rinse the affected part for about twenty minutes with running water and seek urgent medical attention. Clean the product with absorbent paper or a dry cloth and contact your reseller for replacement batteries.

ATLINKS hereby declares that the following models conform to the essential requirements and other applicable provisions of European directive 1999/5/EC.

Versatis F200/Versatis F200 Duo/Trio Versatis F250/Versatis F250 Duo/Trio

#### **12. ENVIRONMENT**

This symbol means that your inoperative electronic appliance must be collected separately and not mixed with the household waste. The European Union has implemented a specific collection and recycling system for which producers are responsible.

This appliance has been designed and manufactured with high quality materials and components that can be recycled and reused. Electrical and electronic appliances are liable to contain parts that are necessary in order for the system to work properly but which can become a health and environmental hazard if they are not handled or disposed of in the proper way. Consequently, please do not throw out your inoperative appliance with the household waste.

If you are the owner of the appliance, you must deposit it at the appropriate local collection point or leave it with the vendor when buying a new appliance.

- If you are a professional user, please follow your supplier's instructions.
- If the appliance is rented to you or left in your care, please contact your service provider.

Keen to preserve the environment, ATLINKS has equipped this appliance with a switching power supply, offering better energy efficiency. The advantages include not only very low electricity consumption, but also a more compact format than the conventional power supply units used by the previous range.

The used batteries from your telephone (if it has batteries) must be disposed of in compliance with current environmental protection regulations. Comply with your local regulations. Return your batteries to your reseller or dispose of them at an approved recycling centre.

Help us protect the environment in which we live!
