Introduction

CAUTION: Please read the safety instructions section in this user's guide for more information. IMPORTANT: Since cordless phones operate on electricity, you are suggested to have at least one phone in your home that is not cordless, in case of power outage.

Parts Checklist

Please make sure your package includes the items shown below.

Telephone base and charger installation

1. Plug the smaller end of the power adapter into the power pack at the back of the telephone base.
2. Plug the telephone line into the jack at the back of the telephone base.
3. Plug one end of the telephone line into a telephone wall jack.
4. Plug the longer end of the power adapter into an electrical outlet not controlled by a wall switch.

If you do not have DSL service, a DSL filter is required (not included). Contact your DSL service provider for more information about DSL filter.

Telephone base installation

Telephone jack requirements

To use this phone, you need a RJ11 type modular telephone jack. If you do not have a modular jack, call your local phone company to find out how to have one installed.

CAUTION:
1. Do not plug the power adapter that came with this unit, telephone base, 6962502MA, charge dock, or any other power adapter, into the power outlets. Doing so may damage the power adapter.

2. To prevent fire or electrical shock hazard, do not expose this product to rain or moisture.

Battery Installation

For optimum battery performance, charge the battery for 16 hours before first use.

1. Place the handset onto the base for charging as shown. A flashing battery icon will appear on the handset screen to indicate the handset is charging. For optimum performance, please allow the battery to charge for 16 hours.
2. Press the handset into the cradle until it locks securely. Turn the excess cord into a coil and tuck it behind the handset.
3. Lift the handset from the cradle and test the connection. If you hear a dial tone, the installation is complete.

Wall mount installation (optional)

The telephone comes with a base bracket that you can install in two different ways:

1. To put the telephone on a desk, connect the base bracket to the upper part of the bottom of the telephone base.
2. To mount the telephone on a wall, connect the base bracket to the lower part of the telephone base.

Plug one end of the coiled cord into the jack at the bottom of the telephone base. Plug the other end of the coiled cord into the bottom of the handset. Turn the handset so the base is facing the wall and press the base flat with the bottom of the handset. Then route the coiled cord through the tabbed slot as shown below.

Telephone base layout

The following table gives a description of the screen display icons on the telephone base.

Saving a phone number from the redit list to the phonebook

1. select the desired phone number

2. **SAVE NUMBER - > []**

3. Enter the name by using the digit key pad

DELETE number from the redit list

4. **DELET ALL - > [] twice to delete all the numbers.**

Mute a call
The mute function allows you to turn off the microphone while on a call. You can mute a call but the other party cannot hear you.

Conference mode

1. to mute a call.

2. to unmute a call.

Using a phonebook record to make a conference call

The screen shows MUTE when mute feature is activated.

Telephone base

1. to mute a call.

2. to unmute a call.

Call waiting with call ID service

To use call waiting, you must subscribe to call waiting service from your telephone company. This feature allows you to receive a call while you are already talking on the phone. If you subscribe to both call ID and call waiting, the information is displayed after you hear the call waiting alert tone.

Note: If you do not use the call waiting service, you will hear the second pause inserted when making calls using a PBX or long-distance service.

When storing a calling card access number and/or PIN in the phonebook, a pause is also needed.

Example: If you need to dial the line access number "9" when making outside calls, enter "9" followed by a pause, then the phone number.

1. Press then long press on handset or on telephone base.

2. Did the number and press on handset or on telephone base.

3. A second pause is inserted each time and a character "9" is displayed.

Voice mail service

The button flashes on the screen when you have received a new voice mail message.

IMPORTANT: In order to use the voice mail service, you must subscribe to it from your telephone service provider.

Phonebook

Each time you store a new phone number in the phonebook, the phonebook can store up to 50 entries. Each number can be up to 20 digits long and each name can be up to 12 characters long. The phonebook can store up to 1000 names and numbers made by the telephone base.

The phonebook on the handset does not apply to another handset.

On the telephone base, the phonebook can store up to 30 entries. Each number can be up to 20 digits long. You cannot store a name on the telephone base phonebook.

Deleting a phonebook record

1. to delete the phonebook record.

2. **DELET ALL - > [] twice to delete all the numbers.**

ENTER NAME: Enter the first character of 12 characters - . Press the key to the corresponding character to display the correct letter.

ENTER NUMBER: Enter the number (max. 20 digits) - .

If you are using a scroll wheel, the first character of the name and a P appears in the display. This will insert a 3-second pause in the digit pad.

NOTE: For a complete list of digit key pads and their corresponding characters, please refer to the character table.

Character table (on/off handset)

Using a scroll wheel, you can below to enter a name (up to 12 characters).

Press to correct on error. Each press of a particular key displays the character in the following order:

1. select the desired phone number

2. **SAVE NUMBER - > []**

3. Enter the name by using the digit key pad

DELETE number from the redit list

4. **DELET ALL - > [] twice to delete the selected number.**

DELET ALL - > [] twice to delete all the numbers.

The mute function allows you to turn off the microphone while on a call. You can mute a call but the other party cannot hear you.

Conference mode

1. to mute a call.

2. to unmute a call.

Using the scroll wheel feature is activated.

Telephone base

1. to mute a call.

2. to unmute a call.

Call waiting with call ID service

To use call waiting, you must subscribe to call waiting service from your telephone company. This feature allows you to receive a call while you are already talking on the phone. If you subscribe to both call ID and call waiting, the information is displayed after you hear the call waiting alert tone.

Note: If you do not use the call waiting service, you will hear the second pause inserted when making calls using a PBX or long-distance service.

Viewing a phonebook record (off/handset)

You can use the menu to access the list of phonebook records.

1. **PHONEBOOK - > []**

2. **LIST - > []**

3. **ENTER NAME - > []**

4. **ENTER NUMBER - > []**

5. **DELET ALL - > [] twice to delete all the numbers.**

Viewing a phonebook record using scroll wheel (cordless handset)

You can also use the scroll wheel to view the list of phonebook records directly.

This is a shortcut method to access the phonebook.

Pause for PBX/long distance service used

When storing a calling card access number and/or PIN in the phonebook, a pause is also needed.

Example: If you need to dial the line access number "9" when making outside calls, enter "9" followed by a pause, then the phone number.

1. Press then long press on handset or on telephone base.

2. Did the number and press on handset or on telephone base.

3. A second pause is inserted each time and a character "9" is displayed.
