

Digital Cordless Telephone

Model BL100

User's Guide

CAUTION

Rechargeable batteries are included with this DECT phone Never use non-rechargeable batteries! Use of improper batteries will void the warranty and risk the danger of explosion.

Introduction

Important Safety Notes

Please observe the following to ensure reliable operation of the telephone:

- Read this manual thoroughly and observe the operating instructions and information provided.
- Place the base station on a non-slip surface and lay the connection cables so they cannot be the source of an accident.
- Do not expose the equipment to extreme temperatures or high relative humidity and protect it from direct sunlight and dusty conditions.
- Clean the equipment with a soft, damp cloth. Do not use any solvents or aggressive cleaning agents.
- Only connect approved accessories.
- Only use the power plug supplied.
- Never open the unit. Opening the unit annuls claims under the terms of guarantee and exposes the person to the risk of an electric shock.

- Repairs to defective units should only be carried out by service centers recommended by the sales outlet.
- We recommend removing the batteries if the equipment is not to be used for longer periods.
- Only replace the batteries with types recommended by us. Dispose of defective batteries according to the applicable local laws (not in household waste). We assume no liability for damage caused by using the equipment for unintended purposes.

Exemption from Liability

We cannot guarantee the information which relates to the technical properties or that contained in this document is correct. The product and its accessories described in this document are subject to constant improvement and further development. For this reason, we reserve the right to modify components, accessories, technical specifications and related documentation of the Product described herein without notification.

Intended Use

This telephone is designed for communicating within a telephone network. Any other use is considered unintended use. Unauthorized modifications or reconstruction not described in this manual is not permitted.

Battery Safety Precautions

- Do not burn, disassemble, mutilate, or puncture. Like other batteries of this type, toxic materials could be released which can cause injury.
- To reduce the risk of fire or personal injury, use only the battery listed in User's Guide.
- Keep batteries out of children.
- Remove batteries if storing over 30 days.

Connecting the Base Station and Power Plug

Connecting the plugs to the corresponding sockets in the base station (they can not be connected incorrectly because the sockets and plugs are designed prevent reverse poling). Lay the cable under the telephone to the rear. Plug the telephone line in the telephone connection socket. Insert the power plug at the other end in the power outlet. The base station is now ready to operate.

Only use the connection cable supplied.

AC power outlet
Phone jack

CAUTION:

Plug the adapter to the socket outlet that is near the equipment and shall be easily accessible. **USE ONLY WITH PROVIDED ADAPTOR.** Using other power supplies may damage the unit.

Getting Started

Install and Charge the Batteries

Insert two pieces Rechargeable AAA batteries in the compartment, ensuring correct polarity and close the compartment

- Please wait for 30 seconds after removing the old batteries when change and install a new pair battery.
- Place the handset in the base station to charge for 14 hours prior for first use. If you don't properly charge the phone, battery performance will be Compromised.
- Use only with provided batteries.

Warning:

The handset will not work and damage if wrong batteries are inserted.

Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instruction for recycling in your country. If batteries are empty, handset LCD will not display and the handset will not respond to any key. Handset is then required to put back on Base Station / Charger cradle to charge.

If handset is not charged fully before use, handset may emit battery low alert tone and battery level indicator will show empty.

Basic Operation

Make a Call

1. Press the  key, wait for a dial tone, then dial the desired number.
2. After finishing the conversation, press  key or place the cordless handset into the charger. The talk timer will be shown for about 2 seconds before return to idle mode.

Pre-dialling

1. When the handset is in idle mode, dial the desired number.
2. Press **C** key to cancel the wrong digit, dial the correct one again. If a pause is needed during dialing, press and hold **P** key for a while and character “**P**” will be shown. A 3 seconds pause will be added while dialing.
3. Press the  key, the number will be automatically dialled out.
4. After finishing the conversation, press  key or place the cordless handset into the charger. The talk timer will be shown for about 2 seconds before return to idle mode.

Adjust the Receiver Volume

While the phone is in talk mode, press  or  key on the handset to adjust the receiver volume of the handset. There are **5** possible volume selections for handset receiver. The display will show the current volume level during adjusting.

Answer a Call

When the phone rings, the icon  will flash and the LCD on the handset will show "CALL". If you have subscribed to Caller ID service from your local telephone company, the incoming call information will be shown.

1. Press the  key to answer a call.
2. After finishing the conversation, press  key or place the cordless handset into the charger.

Auto Answer

If you set on the "AUTO TALK", just need to pick up the cordless handset from the charger to answer the call. Directly, needn't press  key.

Dialing from the Phone Book

Press  button when in standby mode, the first entry in the phone book appears.

Note: If there is no record in phone book, "PB EMPTY" information will display

1. Press  or  key to select the required record from the phone book.
2. Press  key to dial the number.
3. After finishing the conversation, press  key or place the cordless handset into the charger to terminate the call.

Intercom

You can make an intercom between any two handsets (If you have more than one handset).

1. When the handset is in idle mode, press and hold **INT** key, "INT-NUMBER?" will be shown, dial the handset number to call.
2. The called handset will ring and the LCD will show the calling handset's number.
3. Press  key in the called handset to answer.

Call Transfer

The function allows you to transfer an external call from a handset to another handset.

1. When the caller is on line, press and hold **INT** key on the calling unit and dial the handset number to transfer. The line will be put on hold.
2. After the called unit answers the call, the intercom will begin between the two handsets.
3. If you want to transfer the call to the called unit, end the call at the calling unit. The call will be automatically transferred to the called unit.

Note: If the called unit doesn't answer the intercom Call within 30 seconds, the calling unit will return to the talk mode with the caller.

Call Waiting

If you have subscribed to the service of CID on Call waiting, the telephone will show the phone number of another incoming call while you are talking on the phone.

1. Press R key to put the current call on hold and talk with the second caller.
 2. Subsequent presses of R key will toggle you between these 2 callers.
- Caller information of this second call will be stored in the call log.

Three-way Conversation

You may have a 3-way conversation using the intercom and external line.

1. When the caller on line, press and hold **INT** key on the calling unit and dial the handset number. The line will be put on hold.
2. After the called unit answers the call, the intercom will begin between the two handsets.
3. Press \rightarrow OK key on the handset to enter menu, then press \blacktriangle or \blacktriangledown key to select “CONFERENCE”, press \rightarrow OK key on the handset to confirm. The three-way conference will begin between the two handsets and the caller.

Note: Only the calling unit can operate the “CONFERENCE”.

Muting the Ringer volume

Press and hold **C/📞/🔇** key in idle mode to activate or deactivate the handset Ringer. The **🔇** icon turns on or off.

Muting the Microphone

Press **C/📞/🔇** key can switch the microphone on or off during a call. The **📞** icon turns on or off.

Paging the Handset

If a handset has been misplaced, it is possible to call all the handsets.

Short press **Page** key on the base to station.

To stop the page call:

Short press any key on the handset or press **page** key briefly on the base.

Switching the Key Lock On/Off

Press and hold **#**  key to activate or deactivate the key lock. The  icon turns on or off.

Redial Function

The last 10 numbers you dialed out will be separately stored in handset redial memory.

Review and Dial Redial Record

1. When the handset is in idle mode, press  **Vol+** key to display the last redial record. If the redial record is empty, "EMPTY" will be shown.
2. Press **▲** or **▼** key to select the desired redial number.
3. Press  key, the telephone number is automatically dialed out.

Save Redial Number

1. When the handset is in idle mode, press  **Vol+** key.
2. Press **▲** or **▼** key to select the desired redial number.
3. Press **→** **OK** key to enter menu, press **▲** or **▼** key to

select "SAVE NUMBER", press →OK key on the handset, the selected number will be shown, press →OK Key, "ENTER NAME" will be shown and input the desired name. You must input the name, otherwise the record can't be saved.

4. Press →OK key to save.

Delete a Single Redial Record

1. When the cordless handset is in idle mode, press  Vol+ Key.
2. Press ▲ or ▼ key to select the desired redial number.
3. Press →OK key to enter menu, press ▲ or ▼ key to select "DELETE?", Press →OK key, "CONFIRM?" will be shown.
4. Press →OK key to confirm.

Delete All Redial Records

1. When the handset is in idle mode, press  Vol+ key.
2. Press ▲ or ▼ key to select the desired redial number.
3. Press →OK key to enter menu, press ▲ or ▼ key to select "DELETE ALL?", press →OK key, "CONFIRM?" will be shown.
4. Press →OK key to confirm.

Note: In the redial function menu, If you want to return to the redial list, press C key.

Caller ID Service

The caller's information will be displayed and recorded if you have subscribed to Caller ID service from your local telephone company.

When the telephone rings, the caller's information will

be displayed on the handset LCD display. This information includes the phone number and name (if supported). The handset can store up to 20 calls for later review (up to 16 digits and 16 characters for each record). When the memory is full, a new call automatically replaces the oldest call in the memory.

Note: If the caller's information includes Date/Time, the Date/Time will be stored with the record. The Date/Time displayed on the LCD display will be updated after receiving a call.

If the caller number is same as one of phonebook memory, the matched name stored in the phonebook memory will be displayed. If the incoming call is registered as "PRIVATE NUMBER" and its caller ID information is withheld, the LCD will show "WITHHELD". If the incoming call does not have Caller ID service or its service area is not linked to yours, the LCD will show "UNAVAILABLE".

The handset will prompt user if there is unanswered call.

When the handset is in idle mode, "  " will be displayed prior to other display information.

If you reviewed all the missed calls from handset, the display "  " will be disappeared.

Note: 1. If you reviewed all the missed calls from one handset, the display "  " will still on other handsets.
2. Press * key to toggle the display between name and number.

Note: Message alert Indicator will only work if supported by you telephone service provider

Review Caller ID Record

1. When the handset is in idle mode, press  key to display the information for the last call received.
2. Press ▲ or ▼ key to review all call records.
3. When you scroll to the end, "--(GO BACK)--" will be shown.

Note:

1. The "" icon will turn on if the call is a missed call.
2. "EMPTY" will be displayed for 2 seconds and return to idle mode if you have not received any call.
